DEVELOPING A SUSTAINABLE FUTURE

CHOOSE TO REUSE

CHOOSE TO REUSE

We produce huge quantities of waste in Northern Ireland and, despite recent improvements in the amount we recycle, far too much is still going to landfill.

We have to reduce the amount of waste we produce. One of the most significant impacts we can have is to ensure that materials that have a potential for further use in their original form are not discarded. This leaflet shows how you can pass your unwanted goods on to others and encourages you to access **second chance** goods. The economic, social and environmental benefits that this can bring, both locally and abroad, are enormous and there is huge potential for expansion in Northern Ireland.

Play your part in ensuring that we reduce the amount of waste we produce by ensuring that goods which you no longer want get their **second chance**.
